## HAMBROOKS GARDEN WALKWAY SHADING, HAMPSHIRE

Clients: Hambrooks

Our local Garden Centre carried out an extensive refurbishment and made a series of walkways with distinctive paving routes under an 'open' meandering wooden pergola with curved roof beams.

The garden centre approached us to design a suitable "roof covering " to make the "pergola " a Covered Walkway for all seasons. We fitted the roof covering in FR PVC with wooden battens at the lower edges . However, all the panel sections were different so we had to 'make to size' on site and a customised lever system applied appropriate tension.

Budget was minimal and the project was carried out "hands on " in very cold weather!
